

DEBJYOTI DEY

Assistant Manager | DRI-Electrical and Instrumentation

deydebjyoti1991@gmail.com | +91 9540937247 | West Bengal, India

PROFESSIONAL SUMMARY

Assistant Manager – E&I (Direct Reduced Iron)

Senior Automation Engineer with 10+ years of experience specializing in the integration of legacy PLC/SCADA systems with modern IT-OT architectures. Expert in industrial digitalization using MQTT and OPC UA protocols to build real-time monitoring solutions and Node-RED dashboards. Dedicated to modernizing industrial stacks to drive operational visibility and efficiency.

TECHNICAL SKILLS

- **Languages & DB:** IEC-61131-3 (Ladder, FBD, ST, SFC), C#, MySQL, Influxdb
- **Hardware & Control:** PLCs (Rockwell ControlLogix/CompactLogix, Mitsubishi R/Q/Fx), GuardLogix Safety, PowerFlex/ABB/Yaskawa VFDs
- **HMI / SCADA & OPC:** FactoryTalk View SE (Local/Distributed) & ME, PanelView, OPC UA/FT Gateway, Node-RED dashboards
- **Software Tools:** Studio 5000, RSLogix500/500, Connected Components Workbench (CCW), GX Works, GT Designer, CODESYS, AutoCAD

PROFESSIONAL EXPERIENCE

Assistant Manager | Aarti Steel Ltd, Cuttack | *June 2026 – Present*

- Spearheaded comprehensive SCADA modernization upgrades, drastically improving user interface functionality and experience for plant operators.
- Refined control systems to empower operations teams with enhanced asset visibility and real-time process responsiveness.
- Managing and maintenance of critical plant automation software, Licenses, hardware, and network infrastructure.
- Planning and Optimized legacy system architecture to streamline industrial workflows, successfully minimizing operational downtime and production bottlenecks.

Application Engineer | Vision Comptel, Kolkata | *April 2018 – June 2026*

- Deployed OPC Server infrastructure utilizing FactoryTalk Gateway and established robust client-server SCADA network architectures.
- Programmed, engineered, and optimized Rockwell ControlLogix and Mitsubishi platforms across automotive assembly, chassis, and engine lines.
- Tested and commissioned multi-brand industrial drives including ABB (DC), Hitachi, Yaskawa, and Mitsubishi VFDs.
- Designed and verified electrical control panels, schematic diagrams, and upgraded SCADA screens for enhanced operator data density.

Project Engineer (E&A) | Axtel Industries Ltd, Gujarat | *August 2016 – May 2017*

- Programmed, calibrated, and deployed PLC logic, earning corporate recognition for high-quality technical execution.
- Led collaborative engineering teams during the installation, testing, and troubleshooting of plant electrical equipment.

Project Engineer | ATC Engineering Systems Pvt Ltd, Noida | *March 2015 – July 2016*

- Boosted overall production efficiency by optimizing PLC runtime logic to increase output rates and reduce manual intervention.
- Engineered core PLC logic sequences, designed responsive HMI/SCADA screens, and resolved complex electrical issues.

EDUCATION & CERTIFICATIONS

- **B.Tech in Electrical Engineering** – West Bengal University of Technology (WBUT) | 2014
- **Certifications:** Industrial Automation (Sofcon India, 2015) | Electrical Design & Detailed Engineering (Mecci, 2022)
